

José María Lozano Olmedo

Software engineering student

ABOUT ME

I'm a software engineering student looking forward to grow, to learn and to improve my knowledges. Hard work, effort, good attitude and do my best are some of my principles. I'm very interesting in web development, data science and big data. I have learned about web development, desktop applications, algorithms, data structures and data analysis at the university. In addition, I'm a self-taught person and I learned by my own other technologies and abilities to improve as engineer.

TARGETS

I'm looking for a company to do my practises in order to finish my university degree. I'm very motivated about finishing this year my studies and starting working as software engineer. Moreover, I would like to continue my studies with a master at the same time I work

EDUCATION

University of Valladolid

Computer science degree specialized in software engineering
September 2019-Today

SOFTWARE

- java
- python
- javascript
- c
- sql
- html/css
- angular
- android

HABILITIES

- clean code
 - algorithms, data structures, efficiency
 - software planning
 - software techniques
 - soft skills
 - capacity to solve problems
-

PROJECTS

- I have made my own website with html and css
- I have worked in many projects with teammates at university
- Furthermore, I have been making projects with the technologies that I learned by my own

MORE INFORMATION

I have car to move around the city and in the other hand I'm used to remote working. I'm going to have two subjects and "tfg" while doing practises so I'm searching for some flexibility in terms of schedule
