

José María Lozano Olmedo

Software Engineer

ABOUT ME

I'm a Software Engineer recently graduated looking forward to grow, to learn and to improve my knowledges. Hard work, effort, good attitude and commitment are some of my qualities. I'm specialized in Fullstack Development but I also like Data Science. I have learned a lot about Software Engineering at University. In addition, I'm a self-taught person and I have learned by my own other technologies to improve.

TARGETS

I'm looking for a company to continue growing, to improve my habilities and to acquire experience. Moreover, I would like to continue my studies with a master at the same time I work.

EDUCATION

University of Valladolid

Computer Science degree specialized in Software Engineering
September 2019 - July 2023

EXPERIENCE

Indra Minsait

Internship working in web development
February 2023 - July 2023

HABILITIES

I'm specialized in Fullstack Development. I'm more interested in frontend than backend. Most of the habilities that I have in Fullstack Development have been learned by my own. In addition, I have learned many knowledge about Software Engineering at University. I think that a mix between University formation and self-taught knowledge can make me more complete. The technologies that I most use in Fullstack Development are Angular, React, Bootstrap, Tailwind, Spring Boot and NodeJS.

PROJECTS

I have made my portfolio to publish all my projects. Moreover, I have a YouTube channel to publish videos explaining this projects.
